

Anay Singh Sisodiya

Product Designer @ SmartSense Consulting Solutions

anay1242@gmail.com · +91 6263818327 · Portfolio · LinkedIn

Summary

Product Designer with experience designing AI-native enterprise products, analytics platforms and developer tools. Specialized in interaction design, information architecture, dashboard design, AI workflows and translating complex technical systems into intuitive user experiences. Experienced in collaborating with engineers from discovery through production while designing high-impact products for engineering teams.

Professional Experience

SmartSense Consulting Solutions
Product Designer

Jun 2025 – Present
Bengaluru, India

Enterprise AI Platform — Ostrich AI

Enterprise AI platform enabling organizations to govern AI systems, manage datasets, train and deploy ML models, and access decentralized GPU infrastructure through secure role-based workflows.

- **Led** interaction design for Ostrich AI, defining end-to-end user experiences across VaultNest Studio, VaultNest Enterprise, Data Borough, Admin Panel and FlockChain while partnering with client Product Owners to evolve the platform beyond its initial product requirements.
- **Built** scalable design foundations by creating 750+ high-fidelity interfaces, reusable component libraries, variables and adaptive light/dark themes, ensuring consistency across a rapidly expanding enterprise product ecosystem.
- **Designed** role-based experiences across 8+ enterprise personas—including Platform Owners, Enterprise Admins, Data Protection Officers, Data Scientists and Business Users—creating 78+ workflows tailored to distinct permissions, responsibilities and operational needs.
- **Simplified** complex AI infrastructure workflows—including dataset creation, database connectivity, ML model training, inferencing, model hosting, deployment, artifact management and decentralized GPU provisioning—into intuitive guided experiences, enabling non-technical enterprise users to independently perform operations traditionally requiring specialized AI/ML expertise.
- **Partnered** with 2 client Product Owners, 2 Product Managers, 22 software engineers and AI teams to translate evolving business requirements into production-ready interaction models, while mentoring a junior Product Designer throughout the engagement.
- **Reduced** friction across enterprise AI workflows by rethinking information architecture, navigation and interaction patterns, transforming complex cloud operations such as model deployment and infrastructure management into intuitive multi-step user experiences.

AI Knowledge Platform — Second Brain

AI-native enterprise knowledge platform enabling engineering teams to discover organizational knowledge, understand AI-assisted development workflows and accelerate software delivery through conversational interfaces and developer intelligence.

- **Co-created** the vision for Second Brain as one of seven members of SmartSense's AI Innovation Pod, partnering directly with the CEO and cross-functional leadership to transform an early concept into an enterprise AI product shipped for internal adoption within two months.
- **Owned** end-to-end product design across conversational AI experiences, knowledge retrieval, enterprise search, prompt interfaces, session history, document intelligence and AI-assisted developer workflows, translating ambiguous ideas into production-ready product experiences.
- **Designed** 60+ interaction workflows spanning knowledge ingestion, semantic search, document chunking, prompt orchestration, Claude Code session synchronization, leadership analytics and enterprise AI governance across multiple user roles.
- **Conceptualized** and designed Leadership Dashboard, Session Viewer and Claude Usage Intelligence, enabling engineering leaders to understand AI adoption, debug agentic development workflows and optimize engineering productivity through actionable visualizations.
- **Architected** information structures supporting millions of AI tokens, thousands of engineering sessions, hundreds of repositories and enterprise-scale knowledge retrieval while prioritizing discoverability, performance and usability.
- **Delivered** the first internal release of Second Brain within two months, supporting 100+ engineers and synchronizing 10,000+ Claude Code sessions to create a searchable organizational knowledge base for software development.
- **Influenced** enterprise AI architecture by designing experiences around on-premise open-source LLM deployment, ensuring organizational knowledge remained within enterprise infrastructure while satisfying internal security and data governance requirements.
- **Rapidly prototyped** new product capabilities by conceptualizing the complete MVP for Session Viewer in under four days, validating interaction models before engineering implementation and accelerating product discovery.
- **Expanded** beyond traditional product design by contributing production-ready implementations using AI-assisted development tools, collaborating across design, engineering and product to ship features from ideation through deployment.
- **Iterated** continuously through daily design critiques with executive leadership, rapidly refining product direction, interaction models and AI workflows based on real engineering usage and organizational feedback.

Internship Experience

NASSCOM Centre of Excellence — IoT & AI
Graphic Design Intern

May 2023 – Jul 2023
Gandhinagar, India

- **Facilitated** design thinking workshops for enterprise clients (including JSW) and analyzed SIRI assessments to map out digital workflows and optimize Overall Equipment Effectiveness (OEE) for MSMEs.

- **Owned** end-to-end visual assets, producing 30+ cross-platform videos and communication designs within a high-velocity two-month sprint to enhance internal and external stakeholder collaboration.

Positions of Responsibility

Design Coordinator · Amalthea — Led a team 15+ designers in the Annual Technical Summit of IIT Gandhinagar 2022 – 2023

Secretary · Vinteo Filmmaking Club — Secured INR 6L founding equipment budget and led multiple media initiatives 2023 – 2025

Skills

Design Product Design, UX Design, Interaction Design, Information Architecture, Design Systems, Wireframing, Prototyping, User Flows

Tools Figma, FigJam, Adobe Illustrator, Photoshop, Cursor, Claude Code

Domains Enterprise SaaS, Artificial Intelligence, Developer Tools, Analytics Platforms, Dashboards, Design Systems

Achievements & Certifications

Institute Medal — Outstanding Performance in Arts and Culture (IIT Gandhinagar) 2025

Institute Scholarship — Excellence in Arts and Culture (IIT Gandhinagar) 2024 – 2025

Anthropic Claude AI Certifications (4x) — AI Engineering workflows & Core Systems 2025 – 2026

Bronze Film Award — Inter IIT Cultural Meet 2022 – 2023

Education

IIT Gandhinagar — Indian Institute of Technology 2021 – 2025

B.Tech. in Materials Engineering | Minor in Computer Science & Engineering (CPI: 8.07/10) Gandhinagar, India

Interests & Hobbies

Filmmaking, photography, exploring diverse art forms, cooking, and participating in competitive multi-sport activities.
